Doncaster East, VIC 3109 | 0420 413 266 | hasibalamsadat2001@gmail.com

Summary

Data Analyst and Python Developer with a Bachelor of Computer Science (Data Science major, Applied Mathematics minor) from Swinburne University of Technology, graduated with Distinction and a 75% Excellence Scholarship. Currently a Python Developer Intern at Robotic Marketer, building Django features, CRM workflows and campaign analytics, and a Student Support Analyst at Swinburne College, using Microsoft 365 and Excel to track, analyse and report on student data. Experienced in SQL, Python (pandas, NumPy), Power BI, Tableau, AWS and Azure, with prior internships delivering ETL pipelines, dashboards and KPI reporting. Strong stakeholder communication, backed by 4+ years in customer-facing roles.

Skills

Data Analysis & BI: SQL (MySQL), Power BI, Tableau, Advanced Excel (pivot tables, complex formulas, data validation, analytical modelling), data visualisation, dashboards, KPI and exception reporting, ETL, data quality validation, trend and statistical analysis, stakeholder reporting.

Programming & Web: Python (Django, FastAPI, pandas, NumPy), JavaScript, React, HTML, CSS, C#, PHP, REST APIs, API testing, MongoDB (MongoEngine), MySQL, full-stack development, OOP.

Cloud & DevOps: AWS (EC2, Lambda, VPC, S3, IAM, CloudFormation, CloudWatch, CodeCommit), Azure (Virtual Machines, App Service, DevOps, Pipelines, Monitor), Docker, Git, GitHub Actions, CI/CD pipelines.

Microsoft 365 & IT Support: Microsoft 365, Excel, Outlook, Exchange, Active Directory (user accounts and passwords), Windows 10/11, Level 1 and Level 2 support, ticket logging, escalation and SLA compliance, hardware and POS support, technical documentation, end-user training, TCP/IP, DNS, DHCP, VPNs, firewalls, system monitoring.

Professional: Stakeholder consulting, requirements gathering, problem-solving, technical communication, tutoring and mentoring, team collaboration.

Experience

Python Developer Intern | Robotic Marketer | September 2026 – Present

- Develop and maintain features for a Django-based marketing and CRM platform using Python, JavaScript and MongoDB (MongoEngine), working in a team Git workflow on AWS CodeCommit with feature branches, merges and conflict resolution.
- Built Related Lead and Related Opportunity relationships into CRM Activities (forms, views and services), so users can link, edit or clear records from the create, edit and detail views.
- Developed a CRM list import for legacy Media and Email contacts, including a preview and confirmation flow, contact matching, deduplication, tenant-scoped contacts and list memberships.
- Delivered a Campaign Overview performance snapshot showing Impressions, Clicks, CTR and Engagement Value, with derived CTR and recent-performance comparison signals.
- Integrated Blog Performance Analytics and the blog-tracking API into Campaign Center and Activities, and tested approved metrics (sessions, average session duration), unapproved-metric rejection and payload sanitisation.
- Debugged data and integration defects (campaign identifier regression, MongoEngine lookup errors, missing engagement values) and validated changes with API tests and Django system checks.

Student Support Analyst | Swinburne College | September 2025 – Present

- Manage the weekly Student at Risk (SAR) tracker follow-up process in Microsoft 365 and Excel, tracking and reporting on student engagement to support timely follow-up.
- Use Excel analytics tools (pivot tables, formulas, data validation) to analyse student data, identify trends and prioritise support.
- Coordinate with the Student Hub team and academics using Microsoft Teams and Outlook to share updates and follow up on student cases.
- Consult with students and staff to recommend practical next steps and keep follow-up records accurate and up to date.
- Translate data and technical information into clear, actionable guidance for non-technical audiences.

Data Analyst and Web Developer Intern | Gaura Travels | February 2024 – June 2024

- **Reporting & Dashboards:** Designed and delivered data visualisations and operational reports using Python, SQL and Tableau, translating raw workforce and business data into actionable insights to support management decision-making.
- **Data Extraction & Quality:** Extracted and integrated data from multiple systems using SQL; established ETL processes and optimised database schemas to ensure data accuracy, identify patterns and trends, and support exception reporting.
- **Stakeholder Reporting:** Partnered with stakeholders to translate business requirements into reporting and analytical outputs, and guided them on interpreting data to drive continuous improvement.
- **Technical Problem-Solving:** Troubleshoot technical issues and implemented solutions to keep project work on track.

Data Analyst | Global Travel Xperts | March 2024 – May 2024

- Used Excel pivot tables to analyse large data sets and produce detailed reports.
- Maintained SQL queries for a large client database, improving efficiency by 25%.
- Maintained data integrity and security in line with compliance requirements.
- Defined KPIs and built reports with cross-functional teams to draw business insights.

Sales Assistant | The Shaver Shop | August 2022 – Present

- Deliver customer service and build relationships by identifying needs and recommending suitable products, increasing customer satisfaction and store sales.
- Collaborate with the team to meet store goals in a fast-paced retail environment.

Projects

DevOps CI/CD Pipeline (GitHub, Azure, Docker): Built a GitHub Actions CI/CD pipeline that deploys a Dockerised application to Azure App Service, with Azure Monitor and Application Insights for monitoring and scaling.

Restaurant Information System (React, MySQL): Designed and developed a full-stack restaurant management system with reporting dashboards for sales and customer behaviour trends, automated invoicing, secure payment processing and real-time kitchen communication (<https://relaxingkoala.vercel.app/>).

Smart Auditing Platform (React, MySQL, Python FastAPI): Full-stack web application using the Slither analyser and regex-based data extraction to detect smart contract vulnerabilities and display recommendations for each unique vulnerability.

Event-Based AWS Website (AWS Lambda, PHP): Built an event-driven, scalable website for a small photo shop using AWS Lambda and PHP.

Swinburne Industry Project, December 2023 (Winner): Developed a two-year business plan and revenue model for Youth Projects, a social enterprise, covering a customisable online learning platform with an AI consult bot and training centre; awarded first place.

Education

Bachelor of Computer Science (Data Science major, Applied Mathematics minor) | Swinburne University of Technology | Graduated July 2025 with Distinction

Achievements

- Awarded 75% Excellence Scholarship, Swinburne University.
- Winner, Swinburne Industry Project (Industry Spirit), December 2023.
- Received Letter of Commendation from the Vice-Chancellor for academic results.
